

IAV built the first and third phase of this elementary school building. The first phase was the 5.000m² school building, build in a curve with a 400 m radius. Open spaces are in the building that creates a mood of town squares.

The third phase that was built from December 2006 till August 2007 is approx. 1.400 m² extension, partly on two floors.

Customer
Mosfellsbaer

Project start
June 2000 (Dec. 2006)

Project managers
Kristjan Arinbjarnar
Sigurður Orn Jonsson

Structural engineering
VST now Verkis

HVAC engineering
VST now Verkis

Architects
Uti and inni architects

Project finish
September 2001 (August 2007)

Site manager
Baldur Reynisson

Electrical engineering
Tomas Kaaber

Project supervision
Hnit Consulting Engineers
